

Agreement between skripsie student and study leader regarding mutual responsibilities

Project (E) 448, Department of Electrical and Electronic Engineering, Stellenbosch University

Student name
and SU#:

Marco Wiehann Rademan 21561273

Study leader:

Prof J. Versfeld

Project title:

Implementation of a polyphonic, MIDI-controlled, musical, wavetable synthesiser on an STM32 microcontroller

Project aims:

To design, develop and test a MIDI synthesiser on STM32 hardware.

This includes using the hardware peripherals, designing efficient software in C, programming and testing the board and comparing it to theoretical results and models.

1. It is the responsibility of the student to clarify aspects such as the definition and scope of the project, the place of study, research methodology, reporting opportunities and -methods (e.g. progress reports, internal presentations and conferences) with the study leader.
2. It is the responsibility of the study leader to give regular guidance and feedback with regard to the literature, methodology and progress.
3. The rules regarding handing in and evaluation of the project is outlined in the Study Guide/website and will be strictly adhered to.
4. The project leader conveyed the departmental view on plagiarism to the student, and the student acknowledges the seriousness of such an offence.
